Good Morning Paula,

Brent has reviewed the attached report on Sanmina. Please review.
Thank you and Happy Easter!

Please finalize the report. What would be the primary driver(s) behind the NOV?

Brent,

Please review the attached trip report for Sanmina. In the report, they were cleaning out containers of paint and pouring the contents in the sump pump that then enters the sump, then sent to city sewage. I got the Safety Data Sheet from that paint and its non-haz. I'm leaning toward an ENOV for enforcement.

Thank you,

Bailee Dykes
